ANNABURGER vehicle technology for farming

Innovative and superior quality

transport solutions

ANNABURGER

Built to meet the high demands of today's

large scale farmers and contractors

ANNABURGER, if demands increase!

Conventional vehicles, high performance is ensured!

Large
capacity transportation

High
speed

Short
unload times

Large capacity - Silage trailers

Tipper trailers

Combination -
Tipper trailers

Chaser bins

Performance classes
(Total permissible weight)

Tandem	Tridem
16.0 t	29.0 t
20.0 t	33.0 t
22.0 t	-

- A true comparison is always worth-while!

- The profit of the user is the basis for his purchase decision!

- Satisfied customers are the most important advertisement!

- So that harvesting machines work optimally the logistics must be perfect!

ANNABURGER - more than 50 years experience in vehicle engineering
No other supplier can create this product range!

Excellent
distributing quality

Exact
dosage materials

Wide
spreading widths

- Transport vehicles for special work in the farming
- With a variety of equipment variants for optimal use

- In several weight categories for tractors of 70 hp to 260 hp
- All vehicles built to quality-management standard, DIN ISO EN 9001

- All manufacturing of products is carried out by ANNABURGER Nutzfahrzeug GmbH
- ANNABURGER vehicles are developed for large farmers and contractors

**DLG-checked
spreader unit
STE 12 E!**

**Excellent
performance
and value!**

Vehicle combinations, reduced investment requirement and lower capital cost!

Maximum power

Universal manure spreader or moving floor silage trailer

- Converts from a universal spreader to a large capacity silage trailer in a few minutes
- High capacity with versatility
- Suitable for farmyard manure, chicken manure, compost, lime and sludge
- Up to 30 % reduction in capital investment
- With a hydraulic-mechanical driven moving floor
- All equipment compares well with conventional vehicle technology
- Very easy to use with excellent reliability
- Provides intelligent solutions
- Simple operation

Maximum versatility

Maximum reliability

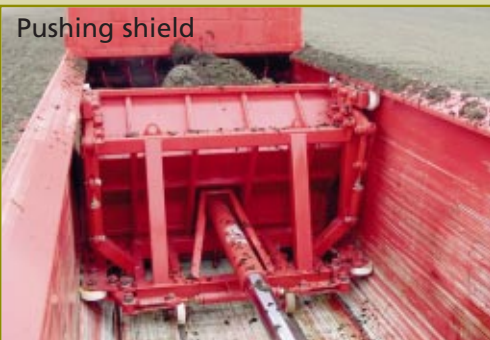

Tipper trailer or chaser bin

- High reloading performance in the grain harvest
- Also for filling seed drills
- Tipper volume in the module system from 17 to 32 m³

**ANNABURGER - Vehicle constructions
for large farms and agricultural enterprises**

In comparison the better solution -
The Schub Fix

- No danger of tipping over in an uneven area
- No problems unloading in low buildings
- Materials can be measured out when unloading
- Eliminates problems of materials "bridging"

- Thick-walled body construction
- Sealed for grain transport
- The on-board hydraulics guarantee enormous thrust
- An excellent spreading pattern
- An exact dosage of the material

- Spread widths up to 24 m depending on material
- The reloading performance up to 12 m³/min
- Also can be used for filling drills and spreaders
- Auger folds easily for transport

Performance classes (tpw)

Tandem	Tridem
16.0 t	29.0 t
20.0 t	33.0 t
22.0 t	–

Vehicle systems

will dominate agricultural transport in the future!

A new generation of vehicle technology –

The Multi Land Plus

Hydraulic suspended drawbar

- Changing the components is possible within **20 minutes**
- Heavy duty frame construction made from box hollow section
- Hydraulic suspension offers the best handling characteristics
- With large tyres for low ground pressure and rolling resistances
- With hydraulic suspended drawbar suitable for all towing devices and heights
- The control and hydraulics systems can be coupled simply and easily

Basic chassis, hydraulic-suspended

**Test in practice and be convinced
by the advantages of the MULTILAND PLUS!**

High
daily capacity

Maximum
year round use

Low
operating costs

Silage module

For the grass harvest

Tipper module

At harvest as well as for the transport of other goods

Chaser bin / reloading module

For rape, grain and all other combinable crops

Universal manure spreader module

For spreading farmyard and chicken manure, compost and lime

Slurry tank module

For the transportation and spreading of liquid manure and fertilizer

All-round module

For all other goods, e.g. straw bales

The MULTI LAND PLUS offers a high professionalism and a maximum choice at six components!

On customer request

Truck trailer and truck superstructures

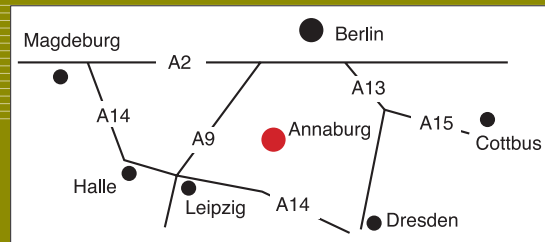

Flat bed trailer

Tank trucks

Hook lifts
